

FACTSET > SEE THE ADVANTAGE

Dear Samanway Ghatak

He has been tremendous with handling the fixes and enhancements for WebConsole, a webapp that has a lot of usage across the Risk & Fixed Income and Portfolio Services departments. The project was transferred to the team with minimal KT and used technologies like ExtJS with which the team had no prior experience, or local support.

You have showed exceptional proactiveness and diligence in getting up to speed with the code base, documenting your findings along the way, and taking ownership of the code base. The users have greatly appreciated the speed with which the fixes and enhancements have been delivered. Keep up the good work!

Regards,
Swaraj Mishra
